

# Notice of Allowability

Application No.

10/066,349

Examiner

Pedro J. Cuevas

Applicant(s)

WACKNOV ET AL.

Art Unit

2834

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address--

All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. **THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS.** This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.

1. ☒ This communication is responsive to amendment filed on January 23, 2004.
2. ☒ The allowed claim(s) is/are 1-44.
3. ☒ The drawings filed on 30 January 2002 are accepted by the Examiner.
4. ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
  - a) ☐ All b) ☐ Some\* c) ☐ None of the:
    1. ☐ Certified copies of the priority documents have been received.
    2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
    3. ☐ Copies of the certified copies of the priority documents have been received in this national stage application from the International Bureau (PCT Rule 17.2(a)).
  - \* Certified copies not received: \_\_\_\_\_.

Applicant has THREE MONTHS FROM THE "MAILING DATE" of this communication to file a reply complying with the requirements noted below. Failure to timely comply will result in ABANDONMENT of this application.  
**THIS THREE-MONTH PERIOD IS NOT EXTENDABLE.**

5. ☐ A SUBSTITUTE OATH OR DECLARATION must be submitted. Note the attached EXAMINER'S AMENDMENT or NOTICE OF INFORMAL PATENT APPLICATION (PTO-152) which gives reason(s) why the oath or declaration is deficient.
6. ☐ CORRECTED DRAWINGS (as "replacement sheets") must be submitted.
  - (a) ☐ including changes required by the Notice of Draftsperson's Patent Drawing Review (PTO-948) attached
    - 1) ☐ hereto or 2) ☐ to Paper No./Mail Date \_\_\_\_\_.
  - (b) ☐ including changes required by the attached Examiner's Amendment / Comment or in the Office action of Paper No./Mail Date \_\_\_\_\_.

Identifying indicia such as the application number (see 37 CFR 1.84(c)) should be written on the drawings in the front (not the back) of each sheet. Replacement sheet(s) should be labeled as such in the header according to 37 CFR 1.121(d).
7. ☐ DEPOSIT OF and/or INFORMATION about the deposit of BIOLOGICAL MATERIAL must be submitted. Note the attached Examiner's comment regarding REQUIREMENT FOR THE DEPOSIT OF BIOLOGICAL MATERIAL.

## Attachment(s)

1. ☒ Notice of References Cited (PTO-892)
2. ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
3. ☒ Information Disclosure Statements (PTO-1449 or PTO/SB/08), Paper No./Mail Date 1/04
4. ☐ Examiner's Comment Regarding Requirement for Deposit of Biological Material
5. ☐ Notice of Informal Patent Application (PTO-152)
6. ☐ Interview Summary (PTO-413), Paper No./Mail Date \_\_\_\_\_.
7. ☐ Examiner's Amendment/Comment
8. ☒ Examiner's Statement of Reasons for Allowance
9. ☐ Other \_\_\_\_\_.

## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments, see page 13, filed January 23, 2004, with respect to claims 1-44 have been fully considered and are persuasive. The U.S.C. § 103 rejection of claims 1-44 has been withdrawn.

Geis et al. disclose the construction of a turbogenerator/motor controller with ancillary energy storage/discharge comprising:

- a fuel source to provide fuel;

- a turbogenerator, coupled to the fuel source, to generate AC power, including:

- a shaft,

- a generator, coupled to the shaft, to generate the AC power,

- a compressor, coupled to the shaft, to provide a supply of compressed air,

- a combustor coupled to receive the supply of compressed air and the fuel,

- said combustor to combust the fuel and to provide exhaust gas,

- a turbine coupled the shaft and coupled to receive the exhaust gas, said exhaust gas to flow through the turbine to control a rotational speed of the shaft,

- and

- a recuperator including a high pressure side coupled between the compressor and the combustor, and a low pressure side coupled to receive the exhaust gas from the turbine;

- a power controller, coupled to the turbogenerator; and

Art Unit: 2834

a battery controllably coupled across the output lines, under control of the power controller, to charge the capacitor.

Edelman et al. teach the construction of a turbogenerator power control system and method having:

a power controller including an AC/DC power converter, said AC/DC power converter to convert said AC power generated by the turbogenerator to DC power on output lines to supply a DC load, said power controller to regulate the fuel to the turbogenerator, independent of a DC voltage on the output lines for the purpose of preventing constant acceleration and deceleration of the engine to meet the changing load demand; and

a capacitor coupled across the output lines and located internal to the power controller, said capacitor to source power to and/or sink power from the output lines, due to load changes by the DC load, to stabilize a DC voltage on the output lines.

Anderson et al. teach the construction of electrochemical capacitors for the purpose of providing control over the properties of the resultant metal oxide materials in the construction of electrochemical capacitors.

Buckley, Jr. et al. teach the construction of control system and method for controlling a gas turbine in accordance with the temperature conditions having a temperature sensor for the purpose of sensing the temperature of the system.

*Allowable Subject Matter*

2. Claims 1-44 are allowed.
3. The following is an examiner's statement of reasons for allowance.

Art Unit: 2834

The prior art of record, taken alone or in combination, fails to teach the construction of a power generation system as described on:

independent claims 1 and 12, comprising a capacitor coupled across the output lines, to source power to, and/or sink power from, the output lines due to load changes by the DC load, to stabilize a DC voltage on the output lines;

independent claim 23, comprising a capacitor controllably coupled, under control of the power controller, across the DC bus via a second DC/DC power converter to source power to and/or sink power from the DC bus, due to load changes by the DC load;

independent claim 34, comprising a capacitor coupled across the output lines to source power to and/or sink power from the output lines due to load changes, said power controller regulating a speed of the turbine, independent of a DC voltage on the output lines;

independent claim 38, comprising a capacitor coupled across the output lines to source power to and/or sink power from the output lines due to load changes by the DC load, said power controller being configured to regulate a speed of the turbine, independent of a DC voltage on the DC bus;

independent claim 42, comprising a capacitor being controllably coupled across the DC bus via the second DC/DC power converter, under control of the power controller, to source power to and/or sink power from the DC bus due to load changes by the DC load, said power controller being configured to regulate a speed of the turbine, independent of a DC voltage on the DC bus.

Art Unit: 2834

Dependent claims 2-11, 13-22, 24-33, 35-37, 39-41, and 43-44 are considered allowable by their respective dependence on allowed independent claim 1, 12, 23, 34, 38, and 42.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### *Conclusion*

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Pedro J. Cuevas whose telephone number is (571) 272-2021. The examiner can normally be reached on M-F from 8:30 - 6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Darren Schuberg can be reached on (571) 272-2044. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9306 for regular communications and (703) 872-9306 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.
